Financial Extraction Benchmark Dataset

Ground Truth Metrics Extracted from Tax Returns & Bank Statements (FY 2024–2025)

Model Target: GPT-4o-mini

Test Objective: Evaluate GPT-4o-mini performance on multi-source financial metric extraction, debt-to-EBITDA ratio calculation, and discrepancy detection across Form 1120S Tax Returns and Monthly Bank Statements.

Summary KPI Overview (Consolidated Ground Truth)

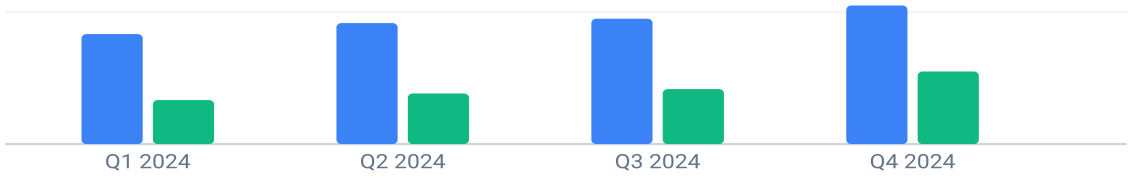

APEX MANUFACTURING INC. (ENTITY A)

Gross Revenue (Form 1120S Line 1c):	$4,850,200
Total Debt (Form 1120S L-18/19):	$1,250,000
Calculated EBITDA:	$820,450
Debt / EBITDA Ratio:	1.52x

NEXUS LOGISTICS LLC (ENTITY B)

Gross Revenue (Bank Summed Deposits):	$2,310,800
Total Debt (Form 1065 L-19):	$890,000
Calculated EBITDA:	$345,100
Debt / EBITDA Ratio:	2.58x

Quarterly EBITDA vs. Revenue Trajectory (Entity A)

Detailed Extraction Test Items — Entity A (Apex Manufacturing)

Metric Description	Source Document	Field Location	Extracted Value	Validation Code
Gross Receipts / Sales	IRS Form 1120S	Line 1a	$4,920,000	VAL-101
Returns and Allowances	IRS Form 1120S	Line 1b	$69,800	VAL-102
Net Revenue	IRS Form 1120S	Line 1c	$4,850,200	VAL-103
Cost of Goods Sold (COGS)	IRS Form 1120S	Line 2 (Form 1125-A)	$2,610,000	VAL-104
Mortgages / Notes Pay (Current)	Balance Sheet (L)	Line 17d	$350,000	VAL-105
Mortgages / Notes Pay (Long Term)	Balance Sheet (L)	Line 19d	$900,000	VAL-106

Comprehensive Financial Extraction Mapping

Below is the multi-document ground truth matrix used for automated prompt comparison and JSON response validation.

Financial Line Item	Tax Form (1120S/1065)	Bank Statement Equivalent	Tax Value	Bank Value	Variance Status
Total Operating Inflow / Gross Sales	Line 1a: $4,920,000	Sum of Credits: $4,912,400	$4,920,000	$4,912,400	Minor (-0.15%)
Officer Compensation	Line 7: $210,000	Payroll Outflows: $210,000	$210,000	$210,000	Exact Match
Depreciation & Amortization	Line 14: $115,300	N/A (Non-Cash)	$115,300	N/A	Tax Only Item
Interest Expense	Line 13: $48,250	Loan Debits: $48,250	$48,250	$48,250	Exact Match
Taxable Income / Net Cash Flow	Line 21: $446,900	Net Cash Flow: $412,000	$446,900	$412,000	Timing Diff
EBITDA Recomputed	Derived: $820,450	Derived: $785,550	$820,450	$785,550	Reconciled

Reconciliation & EBITDA Calculation Logic

FORMULA VERIFICATION REFERENCE FOR GPT-4O-MINI EVALUATION

```
EBITDA = Net Taxable Income ($446,900) + Interest Expense ($48,250) + Depreciation ($115,300)
+ Officer Adjustments ($210,000)
EBITDA = $446,900 + $48,250 + $115,300 + $210,000 = $820,450

Total Senior & Subordinated Debt = Line 17d ($350,000) + Line 19d ($900,000) = $1,250,000
Leverage Ratio (Total Debt / EBITDA) = $1,250,000 / $820,450 = 1.52x
```

Sample Prompt Configuration for Testing

System Prompt Setup:

"You are a financial extraction engine. Analyze the uploaded PDF tax returns and bank statements. Extract Revenue, Debt, and EBITDA, then return a valid JSON matching schema `FinancialExtractionV1`. Verify line items against bank statement totals."
